

Students sign into their LMS accounts – for JSU, this would be Canvas – and selects the **Course Materials** link on the left-hand side.

Once selected, the student will be redirected to the Yuzu bookshelf and automatically signed into their course textbook.

The student will then see their eText (cover shot) with option to access. Clicking on the cover will launch the Yuzu web reader.

If a student wishes to opt-out, they can select the **OPT-OUT** tab at the righthand top of the page.

This will in turn launch a pop-up explaining the benefit of First Day, including the cost reduction, and asking them to verify that they do truly wish to opt-out.

If they wish to opt-out, they will need to click **CONFIRM** (students are automatically opted in).
